

In 2012 was founded the company **CPS Srl** with the target of including two among of the most important brand in the field of lifting, the brand **COPMA** and the brand **Pesci**, with a mission : offer the solutions that better fit with the Customer's needs. The Company has great passions : for the details, the power and the quality. Our engineers works to design, simulate, analyze, evaluate and validate products and process that ensure to our Customers the maximum of value. The Company from it's beginning has been able to internazionalize its product , winning several country in Europe and all around the world.

Today we can state that **CPS** with its brand is a point of reference on the mondial market with its product across five continents.

In 2013, in order to support the vertical integration of production processes, it's acquired a metallurgical company. The acquisition enables us to have complete production line that start from processing raw material and using modern system ensure the maximum precision of the job and the production cycle.

COPMA was founded in 1947 as manufacturer of hydraulic cylinder, since 1948 start its production of crane for truck.

The brand has always led the designing and manufacturing of extensible hydraulic high capacity crane, equipped on industrial vehicles, stationary or marine.

PESCI, another historic manufacturer in the field of cranes , active since 1960, enables us to widen our product range with a product that throughout years has been always a synonyms of quality.

Since 2013 starts also the production of hooklift which has a range of model starting from 3 t. up to 40 t. of capacity.

Thanks the use of high strenght steel as Domex 740 we can get light product and at the same time with a great strenght, this, with the great reliability can satisfy the needs of the Customer all over the world.

Our product range:

Industrial Crane:

Wide range of models from 3,5 up to 160 t.m with renewed version and new models in every sector. We have at the moment the most modern range thanks to the model 35, 42, 60 (very interesting for its low tare weight and for its width

from 1,9 to 2,0 m, according to the version, particularly suitable for vehicles with truck cabin of small size and with GVW of 6,5 - 7,5 t) in the medium high sector, with the introduction of the new model 200, that it's going to widen the range "Essential" , which now include 8 models. Among the news in the middle-high sector there is the introduction of the models 510, 530, 630 and 650 available in the version 6J4, 6J6 and 8J4.

In the high range we complete the model 1600, available now in every version of Jib with reachable highs of 40 mt with the version 9J7.

Marine Crane

The range of the marine cranes is characterised for the high reliability, as well as for the meticulous treatments and controls to which are subjected the crane before their delivery. The range include models from 2,4 to 160 txm

Scrap -Timber Crane

Range of foldable to Z shape , all designed according the category H1B4, with models particularly interesting such as the model FS 24Z, that can easily mounted on vehicles from 3,5 ton, and that can be folded behind cabin, with the grab or with the wood grab. This model is particularly suitable for the collection of shrubs pruning, as well as for the collection of scattered metal parts or for removing bulky waste. Recently has been introduced the new model Top of range FS 130Z, that in addition to the performance on the top of category, can easily be mounted on all truck because the boom folded slope to the lower line of the basement of only 160 mm.

Hook Lift

The range of Hook lift C.P.S. , recently completed has model starting from 3 t. up to 40 t in every version of length that can be mounted on all truck so far produced

Our Company is at your disposal to find the right application that may require specific performance or for evaluating customized solution.
